The Problem of Light in the Political Novels
of Joseph Conrad

It has been said that the political novels of Joseph Conrad are
enjoyed primarily by those who have never read a good Russian novel. It can
also be said, however, that . . . . .

Andrew Carnegie: The Father of Middle-Class America

For decades Americans couldn’t help but love the red-headed, fun-loving Little Orphan Annie. The image of the little girl moving so quickly from poverty to wealth provided hope for the poor in the 1930s, and her story continues to be a dream of what the future just might hold. The rags-to-riches phenomenon is the heart of the American Dream. And few other people have embodied this phenomenon as much as Andrew Carnegie did in the late 1800s and early 1900s. His example and industry caused him to become the father of middle-class America.

Andrew Carnegie can be looked to as an ideal example of a poor immigrant making his way up to become leader of the capitalist world. Carnegie was born into a poor working-class family in Scotland. According to the PBS documentary “The Richest Man in the World: Andrew Carnegie,” the Industrial Revolution was difficult on Carnegie’s father, causing him to lose his weaving business. The Carnegie family was much opposed to the idea of a privileged class, who gained their wealth simply by inheritance (“Richest”). This type of upbringing played a large factor in Andrew Carnegie’s destiny. In order to appease his mother’s desire for material benefits, and perhaps in an effort to heal his father’s wounds, Carnegie rejected poverty and cleaved to prosperity.

Carnegie’s character was ideal for gaining wealth. His mother taught him to “look after the pennies, and the pounds will take care of themselves;” he later turned this proverb into “wast the costs, and the profits take care of themselves” (“Richest”). Such thrift was integral to his future success. He also believed that “all is well since all goes better” (“Richest”). His theory
MLA Style for Electronic Sources

Citing Electronic Resources: MLA Style

This handout is a short guide for citing commonly used electronic sources using Modern Language Association (MLA) style. For additional information, consult the *MLA Handbook for Writers of Research Papers* (7th ed.), available in Quick Reference and in the stacks under call number PE2369.G5 2009. The Owl at Purdue website also offers formatting guidelines and additional citation examples: http://owl.english.purdue.edu/owl/resource/747/01/

When citing, you must give the reader enough information to locate the source. In MLA style, sources are briefly cited within the text and a full bibliographic entry is included in a Works Cited page at the end. Below are examples of bibliographic entries for electronic sources. Consistency is essential.

Note: With the 7th edition, URLs are no longer required for web sources and should only be used if necessary to identify source. If included, it should come at end of citation in angled brackets, <URL>.

**Webpage**

If no publication date given, use n.d.

Author (if known). “Title of Page.” *Name of Site*. Name of publisher/sponsor of site, date of publication. Medium of publication. Date accessed.

**Electronic Articles from Subscription Database**

**Beware:** Some databases will automatically generate a citation for you. However, there are often things that need to be changed. Make sure you proofread these and make appropriate changes.
Free Online Research Databases

Remember, research is like detective work. You must work to find the information that supports your topic. Keep in mind that not all research is good research. In other words, be mindful of the thousands of websites that are created by special interest groups often using the web for propaganda campaigns. The type of research you cite in your paper is what will determine the credibility of your thesis. Do not compromise all of your hard work by quoting and citing non-credible sources. Part of this lesson is to get you to decipher what is worthy in your paper.

Here are FREE online databases. Use specific keywords to produce results closest to your thesis. Remember, you are becoming a mini-expert at your topic... read, learn and enjoy the experience of discovery!

(Note: some databases require you to register)
